## Model Q Series

1.5RQ

2RQ

3RQ

5RQ

Equi-Tech's flagship Model Q rack-mounted balanced power system cleans up incoming power to give your system the purest, most distortion-free result possible. Made with high quality switches, a digital readout and patented LoNo technology contained within the Q series transformer. Compared to traditional isolation transformers, the Q series transformer is acoustically quiet making it possible to situate the unit in critical listening areas.

## Model R Series

1R

1.5R

2R

The Model R series provides the same unparalleled sound quality and outcome as the Model Q series. The R series doesn't include enhanced features and upgraded components such as switches, digital readout, and the patented LoNo technology contained within the Q transformer.

## Wall Mount Transformers

5WQ

10WQ

15WQ

20WQ

Wall-mounted transformer systems are designed to blanket a facility with clean and phase coherent AC power. Power that remains clean regardless of how many components are plugged in. This gives you the peace of mind you need when planning your space and its important power infrastructure. Our wall systems are ideal for most multi-circuit applications and can ensure your space is provided with clean, balanced power.
